1.4.5 Mechanical interlock BB

BB locks any two contactors of the “C“ series mechanically. The unit must be closed without clearances between the two contactors. If mounted on a rail, clamps must secure the contactor’s position. Otherwise, see the drawing of fixing holes.

Outline drawing

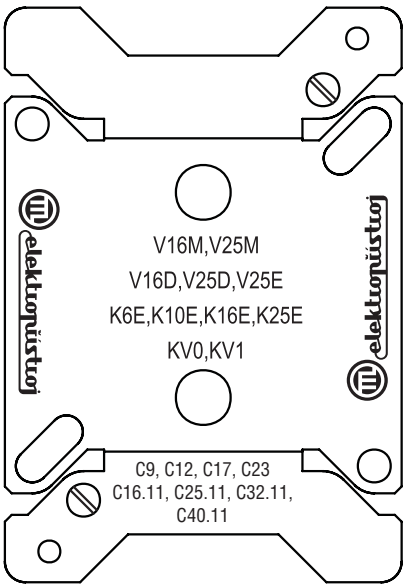

Contactor type	a	b	c	d
C9.■■, C12.■■, C17.■■, C23.■■	59	50-60	35	2 x M4
C16.■■, C20.■■, C25.■■, C32.■■, C40.■■	70	50-60; 75	45	2 x M4
C50.■■, C65.■■, C80.■■	84	75; 90	60	2 x M5
C95.■■, C115.■■, C150.■■	99	100	45	3 x M5

1.4.6 Fixing adaptor VKC

The adaptor helps by quickly replacing obsolete contactors (V16M, V25M, V16D, V25D, K6E, K10E, V25E) with series “C“ contactors – up to C40.■■.
